Additional Reading

Informed Consent

McCarthy DM, Leone KA, Salzman DH, Vozenilek JA, Cameron KA. Language use in the informed consent discussion for emergency procedures. Teach Learn Med. 2012;24(4):315-20. Analysis of 26 resident discussions with SPs indicated physicians talking dominated and language was more complex than that of patients.

**Caregivers, grieving, depression**

**POLST, CPR and resuscitation issues**

between patient orders and EMS response in patients with previously signed POLST form.

**Advance Directives and End-of-Life Wishes**

Allison TA, Sudore RL. Disregard of patients’ preference is a medical error. JAMA Intern Med 2013; 173: 787-8. Editorial suggesting that studies showing that documentation is poor and that intensity of treatment was discordant with patient wishes in close to 70% of patients > 80 years or with serious illness indicate the problem should be approached as an “egregious ‘failure of communication’ error.”

**Variety of Topics:**

Alfandre D. Reconsidering against medical advice discharges. J Gen Intern Med. 2014;29(5):706. From VA Ethics; plea for research agenda to achieve high quality AMA discharges, define best practices, and avoid the problematic forms. (See also his JAMA editorial: What is wrong with discharges against medical advice (and how to fix them). 2013; 310: 2393-4.)

Sisti DA, Segal AG, Emanuel EJ. Improving long-term psychiatric care: Bring back the asylum. JAMA 2015; 313: 243-4. Deinstitutionalization has become “transinstitutionalization” as patient end up homeless, in EDs, or jails. Propose integrated assisted treatment in community, and long-term psych institutions to break the unstable acute cycle for persons with severe or untreated disease.

**Other recent important contributions to ethics literature:**

Chast R. Can’t we talk about something more pleasant? NY Bloomsbury, 2014.
